Ledyvas Financial CFO

Quick Start Guide

Strategic vision · Smart decisions

What it is

Ledyvas Financial CFO turns your company's accounting into a decision dashboard: results, liquidity, debt, cash flow, budget and a monthly Action Plan. It installs on your computer and your data stays on it.

Get started in 4 steps

1. **Install** the program on Windows. The first 14 days are free, no card needed.
2. **Connect your data** in “Import Data”: direct read-only API connection to QuickBooks Online, Odoo, Zoho Books, Xero and Alegra, or files from Ledyvas Enterprise, Ultimate and Métrica, or a balance typed by hand. You can load up to 3 years of history.
3. **Open the Executive Summary**: sales, EBITDA, net income, cash flow, liquidity and debt on one screen. Tap any figure to see where it comes from.
4. **Activate your license** when the trial ends: in “Settings › License” copy the machine code, use it on the activation link you receive by email, and paste the key that starts with LC1- here.

What you'll find

- **Key Indicators** and **Alerts**: what drifts from target, with its formula and source.
- **Analysis**: profitability, costs and waste, efficiency, liquidity, working capital, debt and cash flow.
- **Planning**: budget, budget vs actual, projected cash and forecast with scenarios.
- **Action Plan**: every month, what happened, how much money is at stake and which actions to take. You decide, assign an owner and a date, and track progress.
- **AI Assistant**: ask anything about your figures. It uses your own Anthropic key (“Settings › AI”) and connects only with your permission; without a key, the analysis still works with rules.

Deliver and export

Monthly report as PDF or print. Every table exports to **Excel** and **CSV**. Available in 6 languages, 156 currencies, light and dark mode.

Launch rate. US$ 129 per month or **US$ 1,290 per year** (a year costs 10 months). Bundle with Ultimate: **US$ 159 per month** or **US$ 1,590 per year**. Launch rates, subject to change.
